CAMPUS TOUR

Higher Education Highlights

From New York to North Carolina, Mueller Associates has engineered many signature buildings on college and university campuses. We've supported the addition of state-of-the-art laboratories, new centers for the performing and fine arts, advanced instructional environments, cutting-edge technological infrastructure, and a host of other campus expansions and building restorations.

While we bring 45 years of mechanical, electrical, and plumbing design experience to our work on higher education campuses, we recognize that every project is unique. We invite you to tour these recent highlights, and learn about our portfolio of more than 100 college and university projects at www.muellerassoc.com.

Mueller

Established in 1966, Mueller Associates is a mechanical, electrical, and plumbing engineering firm. We are based in Baltimore, and work on projects throughout the Eastern U.S.

Mueller Associates specializes in higher education facilities, museums and cultural facilities, laboratories, healthcare facilities, and office buildings. We are proud to work with many of the nation's premier architectural firms and their most discerning clients.

All of our CADD workstations are equipped with Revit® 3-D Modeling BIM software. For more information on Mueller, including issues of our *Momentum* newsletter and *On Point* interviews, visit www.muellerassoc.com.
