A new 42,000-SF, sustainable visitor and history center

State-of-the-Art Strategies for a Historic Site

The new 42,000-square-foot visitor and history center at Thomas Jefferson's Monticello accommodates ticketing, orientation, exhibitions, exhibit storage, retail, and food service, along with space for educational programs and a discovery room. This LEED® Gold project features geothermal heat pumps, variable air flow units, water-conserving plumbing fixtures, central lighting controls, energy use monitoring, carbon dioxide sensors, and efficient HVAC equipment.
